

80W LED moonflower effect featuring a barrel mirrored scanner

The **Eliminator Lighting Vortex** is a classic moonflower effect with a barrel mirrored scanner that produced multiple razor-sharp 5-degree beams of light powered by an 80W LED engine. It features 10 Color/GOBOS combinations, GOBO shake effect, mesmerizing strobe effects and has 6 built-in light shows.

The Vortex may be controlled by DMX, Remote Device Management (RDM), sound activation or in show mode from a 4-button control menu with a digital display. The quick barrel movements run 180-degrees on the X-axis and 260-degrees on the Y-axis. The beams may be focused from manual focusing knob.

A great effect for those who love fast moving scanner, the Vortex is compact and lightweight, making it a great effect for venues with low ceilings or tight spaces, bars, lounges, roller rinks, jump parks and fun centers.

LIGHT SOURCE:

- 80W White LED (50,000 Hrs.)

BARREL MIRROR:

- Barrel Movement: X-Axis = 180°, Y-Axis 360°
- Beam Angle: Multiple Beams, 5° each
